

**Type of Meeting:** Shell Rock and Winnebago One Watershed, One Plan Steering Committee

**Date:** July 29th, 2020

**Time:** 10:00am to 12:00pm

**Location:** Zoom Meeting

**Facilitator:** Paul Marston

**Attending:** Rachel Wehner, Andy Henschel, Courtney Phillips, Dalton Syverson, Chad Billet, and Paul Marston

**Agenda:**

1. Introduction
  - Paul opened up the Zoom meeting and gave a quick update on what has been done since last meeting.
2. Review Advisory Committee Issue Statement Comments
  - Discussion included what the source of groundwater ammonia is. Its natural in nature but the study is not worth the money to see where it is actually coming from.
  - The group discussed the Geo-Atlas. The Steering team is unaware of how much it costs, deciding factors, who completes it, what does it all include, etc. Paul was going to look into the details of this study.
  - The group decided to swapping the order of the groundwater goals
  - The focus is going to focus on private wells, uncapped non-public
  - The group wants to be reactive with education, outreach to increase well testing.
  - Paul was going to clean up and send out for review.
3. Review Project List
  - Paul pulled up the project listing that was completed. Before the meeting he asked if individuals could look over the table and fill in blanks. There was not a good turn out from this homework so the steering team went through the project list project by project after Paul tried to tidy it up. The group filled in what we could but some individuals were offered to find answers to project details.
4. Next Steps
  - The team has to fill in the project details that were discussed
  - Once cleaned up, there will be a Policy Committee Meeting.
